Step 3

ENTER YOUR COMMENTS HERE:	
<p>A 9.8 percent rate increase by APS for power services is outrageous. This is an especially bad time for a rate increase with the economy as volatile as it is. Higher gas prices hurt all of us. More people are getting laid off and the people that are working are getting little or no raises to make up for the increase in the cost of living. An increase on our utility bill would be very difficult to meet for most people in our state. An increase of 9.8 is extremely high and should not be approved. It would be a great burden for all.</p>

This Proposal is inconceivable. Why is this company continually asking for and receiving Hugh rate increase? Any company in the private sector would be forced to manage there resources so that they could conduct their business or cease to function. My electric bill during the summer months is already 300 dollars.

As soon as I received this proposed increase I started to check into changing eclectic suppliers (which I understand can now be done) and if you allow this rate increase to occur I would hope that at lease 1/3 of the4 people served by APS will do the same.
